

Fleet Optimiser

Are you ready for your fleet diagnosis?

Take the first step towards balancing cost, choice and responsibility in your fleet strategy and policy, with Australia's first fleet diagnostic tool.

Move beyond the limited scope of the monthly lease. With our unique fleet expertise and data we will analyse your whole-of-life costs and the implications on your bottom line.

Analyse your fleet in the same way that you manage your operational costs, providing an accurate basis for making strategic fleet decisions.

Benefits to business

Funding & Tax

- Compare the financial impacts of eleven funding options enabling you to identify the ideal fleet financial solution for your business.
- Review up to five funding scenarios to make accurate cash flow comparisons.
- Consider all your direct and indirect tax positions, funding rates and inflationary factors.

Operational Costs

Accurately reflect market changes and the sensitivity of these changes in the operational management of your fleet:

- Effects of replacement cycles and lease terminations,
- Different lease terms,
- Kilometre profile adjustments, and
- Maintenance, servicing, fuel and insurance.

Vehicle Choice & Responsibility

Capitalise on real time data and expertise when modelling your fleet strategy by implementing best practice in vehicle choice and carbon emissions.

Design the optimum fleet solution and policy that matches your specific business objectives.

Analytical Reports

Examine your optimum solution, line-by-line with yearly and monthly tax reconciliation and discounted cash flow.
