

Enhance your fleet's operational efficiency by drawing on our 30+ years of industry experience in fleet management and leasing solutions for Heavy Commercial Vehicles.

Regardless of what industry segment you operate in, FleetPartners has the knowledge to match any fleet management demands or industry specialisation. Our tailored fleet solutions put safety and compliance first, and help you improve cost management while maximising equipment utilisation.

Safety and Compliance services

Our comprehensive range of safety and compliance services are designed to meet the needs of transport operators. This includes:

- Vehicle maintenance and safety inspections
- Procedural GAP analysis of compliance with National Heavy Vehicle Laws
- Fleet safety and loss prevention review
- Safe fleet and driver orientation programs
- Risk Assessments
- Development of Fleet Management Guides

Maintenance services

For those organisations who choose to own their fleet, we can extend the same disciplined fleet support services through our Maintenance, or our Fleet Management programs.

FleetPartners Maintenance program

Our Maintenance program offers tailored maintenance budgets for every vehicle:

- Create ease of forecasting whole of life maintenance costs over the life of the vehicle
- Verify actual versus budgeted amounts at set intervals
- Access to FleetPartners Maintenance Control, heavy vehicle technicians who control all service and repair costs
- Access FleetPartners Repair Ready Network
- Leverage a suite of online reports providing visibility of critical activities and performance metrics in real time

In addition, we offer fleet systems and support for:

- Tyres - onsite tyre management
- Registration and fines management
- Emergency roadside assistance and towing
- Fleet washing services
- Accident Management Services
- Vehicle specification, configuration and delivery
- Vehicle remarketing/disposal channels

FleetPartners Fleet Management program

Our Fleet Management program offers the same benefits as listed under the Maintenance program. However, all fleet expenditure is billed each month with all costs and fees presented in one consolidated invoice.

Leasing and Transportation specialists

At FleetPartners, our team of transportation specialists can deal with complex demands that require a hands-on approach. For example:

We can structure rental and operating lease options on lease terms between 2 - 10 years.

You can tailor our fleet management solutions using our Repair Ready network, or we can maintain the entire fleet at your facility.

We can maintain all components of the vehicle, chassis, body and ancillary equipment.

Where there is seasonal or peak demands, we can maintain a fleet of short-term rental equipment, minimising any operational impact.

With access to this team, you are in partnership with professionals who have the appropriate experience and knowledge, to meet with your demands.

Specialist support – every step of the way

We assign a dedicated business manager and our team of professional on the ground support staff. Together, they guide your business at every step from needs assessment, to design, to acquisition and ultimately disposal.
